

MIRA 40

SMALL • COMPACT • STRONG

Small but strong: Stainless steel chasis inox AISI 304 and the working width is 410 mm. With 3 liters of solution tank capacity, however a cleaning capacity of 100 square meters thanks to "eco" function that controls the distribution of water in timed manner. 13 Ah lithium-ion battery of 36 volts that allow you to get one hour of autonomy. Essential machine for deep cleaning in small rooms and full of obstacles. Thanks to its accurate drawbar allows access under tables, furniture, shelves, etc.

Mira is also designed for application other than normal use as a scrubber drier, thanks to its squeegee that is liftable and also to its weight and thus pressure on the ground, we can use it to de-waxing or polishing treatments , just like a single brush machine.

Applying different types of brushes or pad holder, this machine is really polyvalent. All this is possible due to the oversizing of the motors which ensures functionality and effectiveness is uncommon, but above all we made the variable brush rotation speed.(two 210 mm diameter counter-rotating brush). From 140 to 210 rpm.

"MIRA" is extremely small and compact that you can easily loading this machine even in a small car.

TECHNICAL SPECS

Working Width Mm:	410
Cleaning Capacity Sq Mt/hour:	500
Power Unit B = Battery:	B 36 VOLT / 13 ah
Brushes Size Mm:	2/205
Brushes Speed Rpm:	210
Brush Pressure:	gr/cm 40
Vac Capacity:	900 mmh 20
Clear Water Capacity:	3 lt
Recovery Tank Capacity:	5 lt
Max Working Time Capacity:	1 h
