

MAXI ORBIT

SETTING NEW STANDARDS FOR THE ORBITAL MACHINES

ROTO-ORBITAL SYSTEM

The Maxi Orbit series machines combine two mechanical movements: orbital and rotational. The combination of these two movements causes vibrations that can easily perform cleaning, polishing, de-waxing, micro- polishing jobs, on different surfaces like carpeting, PVC, linoleum, stoneware, parquet, marble and natural stone.

The combined orbital and rotation movements enable fast, effortless cleaning; the vibrations take the dirt upwards so the pad can capture it without having to use aspirators or chemical products.

In crystallization, de-waxing and micro-polishing jobs, the roto-orbital movement makes the job easy and not too tiring. The double movement considerably reduces machine attrition with surfaces, with no loss of efficiency and lower power consumption.

The Maxi Orbit movement causes thousands of vortices on the tool drawing the dirt upwards. These orbital vibrations provide unequalled cleaning on any surface.

ECONOMIC SAVINGS

The roto-orbital system of the Maxi Orbit series consumes less energy and the double mechanical movement drastically reduces the consumption of chemical products saving a lot of money.

WATER SAVINGS

The roto-orbital Klindex systems saves a considerable quantity of water on jobs performed on any type of surface. This feature makes Maxi Orbit machines "eco-friendly".

TIME SAVINGS

The combined rotational and orbital movements reduce cleaning and polishing times needed. With Maxi Orbit you get the best results in less time with minimum effort.

MAXI ORBIT ADVANTAGES

STABILITY

Thanks to its roto-orbital movement, Maxi Orbit offers excellent performance while simultaneously maintaining great stability and uniquely simple manoeuvrability, a level of quality that allows the machine to be used by inexperienced operators or others with no particular physical strength.

VERSATILITY

Thanks to its manoeuvrability and versatility, Maxi Orbit is the ideal machine to be used on any surface and in any place.

Maxi Orbit is indicated to reach narrow spaces, flush with walls, and allows operators to work with the handle at any inclination.

CRYSTALLIZATION

The roto-orbital movement makes Crystallization fast and easy. The double rotational/orbital movement drastically reduces machine attrition on surfaces to be crystallised, making the job light and easy to do for inexperienced operators, guaranteeing an impeccable, professional result.

MANOEUVRABILITY

The Maxi Orbit is excellent to manoeuvre even if used with its wheels raised. This position means work pressure can be increased and allows the operator to work easily on narrow surfaces like steps and stair landings.

EXTRA WEIGHTS

If work pressure has to be increased, the Maxi Orbit can be equipped with a maximum of 4 weights weighing 5 kg each.

REST POSITION

The head of the Maxi Orbit can be lifted by 90°; a position recommended when the machine is not working and to avoid any alterations to the pad left under the pad holder.

Cleaning fitted carpeting and rugs

Shampooing fitted carpeting and rugs

Crystallization

Micro-grinding of natural stone

Cleaning and polishing gres

De-waxing linoleum, PVC and rubber

Grinding and sanding parquet

Oil finishing for parquet with raised wheels

MAXI ORBIT

Roto-Orbital single brush

Watch the VIDEO

Maxi Orbit, the advanced professional multi-purpose single brush which makes it easy and quick working on all surfaces. Suitable for treatments such as • polishing, • de-waxing, • crystallization • light grinding on marble, concrete, stone, parquet, terracotta and stoneware, Maxi Orbit is also ideal for cleaning delicate surfaces such as carpets and rugs.

The oscillating head adapts to all surfaces and allows to work easily even on uneven surfaces minimizing user fatigue. The great number of accessories and the big wheels on the ground make working simple and efficient. Thanks to its high-frequency oscillations roto-orbital principle, Maxi Orbit amazes for the excellent stability and manoeuvrability making the crystallization operations with steel wool fast, easy and effortless. The robust and compact chassis, the reinforced rod's ergonomic handle, the large wheels, its low weight and the release system of the main components (optional), make of the Maxi Orbit a strong machine very easy to carry.

TECHNICAL DATA

Model	Motor Watt max	Volt	Hertz	Speed	Working width	Liquid tank	Dimensions WxHxD cm	Weight
Maxi Orbit 1500	1500	230	50	1400 rpm	430mm (17")	18 lt	70x43x128	40 Kg
Maxi Orbit 3000	3000	230	50	1400 rpm	430mm (17")	18 lt	70x43x128	52 Kg

Compact design

Extra weights 6Kg each (optional)

Handle for an easy lifting

MAXI ORBIT SANDER

Roto-Orbital sanding machine
with integrated dust extraction

- ✓ Very easy to use
- ✓ Reduced maintenance
- ✓ Low power consumption
- ✓ Low dust dispersion

Maxi Orbit Sander is the professional, innovative and multi-functional single-brush that makes working on all surfaces quickly and easily. The oscillating head adapts to all surfaces and allows for easy manoeuvres also on uneven surfaces, thereby minimising operator fatigue. Countless accessories available and the large wheels resting on the ground allow for the work to be simple and efficient. Thanks to the roto-orbital principle with high-frequency oscillations, Maxi Orbit is surprising for its excellent stability and manoeuvrability. The robust and compact frame, the ergonomic handle with reinforced rod, the large wheels, the light weight and the release system of the main components (optional) make Maxi Orbit a durable machine but also one that is easy to transport. Thanks to its roto-orbital movement, Maxi Orbit offers excellent performance while simultaneously maintaining great stability and uniquely simple manoeuvrability, a level of quality that allows the machine to also be used by inexperienced operators or others with no particular physical strength. Thanks to the roto-orbital technology you can even work in homes with old electrical systems because the machine consumes less power than a traditional single-brush. Excellent not only for parquet but also for treatments and washing brick, carpet, marble, etc.
