

MIRA 40 is equipped with a stainless steel chassis which makes it strong and durable. Despite its 3L solution tank capacity, it has an amazing cleaning capacity of 850 Sq m. The machine ensures consistent cleaning through its strong suction motor which allows vacuuming and recovery of 5L of water/dirt through each pass. Dirt and water is immediately sucked into the recovery tank without clogging the vacuum hoses or the floor squeegee thanks to the direct line. This is possible due to its 'eco' mode that controls the water distribution in a timed manner. In addition, it's 36V'/13Ah lithium-ion battery give the user average 80mins of use upon full charge. Thanks to its flexible drawbar that allow access to the narrowest space and under fixtures, it is the essential machine for deep cleaning of small rooms or areas that are full of furniture!

Apart from being a scrubber-drier, the MIRA 40 can also be used for other applications like de-waxing and light polishing due to its liftable squeegee, weight and working pressure.

With its strong motor and different accessories (such as brush types and pad holder) available, the MIRA 40 is a really versatile machine. Together with its variable dual brush rotation speed, this is the machine to use for most functions in most areas!

410mm working width Floor squeegee can be raised when not in use
